Engineering Firm Turns to ioSafe for Disaster Proof Hardware

Tom Gogoe, CEO of Synergeering Group, an engineering firm based in Michigan – knows all about hardware design and manufacturing. Since founding the company in 2001, Tom Gogoe has led a team of experienced engineers who continue to master the art and science of creating the highest quality freeform fabricated parts.

Thus when the company needed a new system for secure data backup and recovery, Tom investigated several products thoroughly. In the end, he selected the ioSafe disaster proof hardware for onsite data storage.

**“The ioSafe solution has been the answer to all of our problems,”
-commented Tom Gogoe, EO of Synergeering Group.
“Tape backup was a real hassle to operate, often we didn’t even change the tape.”**

Besides the convenience, onsite disk back up offers fast data transfer and reliable data recovery. “Our IT guys also have more time to work on other projects,” said Tom. “So not only does the ioSafe product save money for us, but it allows us to be more productive in other areas.”

The ioSafe device is fireproof, waterproof, and can withstand a building collapse – key builtin features to protect data from damage.

**“Since implementing the ioSafe product, I have more peace of mind to focus on revenue generating activities,” said Tom.
“It’s a turnkey solution; we just plugged it in and it’s been protecting our data ever since and without a hitch.”**

AT-A-GLANCE

Reseller:

Synergeering Group
Halsted Commerce Park
25335 Interchange Court
Farmington Hills,
Michigan 48335

Challenge:

Find a better system than tape for secure data backup and recovery.

Solution:

They installed an ioSafe S1, a 750 GB disaster proof disk based backup and recovery solution.

Results:

- Greater peace of mind knowing business data is safe and secure
- More time for IT staff and management to focus on revenue generating activities

Comments:

“I highly recommend the ioSafe solution to every SMB out there. It’s affordable for SMBs like ours and it’s a fantastic IT investment given all the benefits it brings.”

“So not only does the ioSafe product save money for us, but it allows us to be more productive in other areas.”

Synergeering Group is one of many happy users of the ioSafe solutions. "I highly recommend the ioSafe solution to every SMB out there," said Tom. "It's scalable to support our business growth. It's affordable for SMBs like ours. It's a fantastic IT investment given all the benefits it brings. We're thrilled with it."

Synergeering Group

An engineering firm that designs and manufactures plastic and metal components.
